# SUPERCUB

We are pleased to announce a new addition to our fleet- the SUPERCUB- in an exciting collaboration with Workboats Northwest. This design originated as a custom request for a commercial fishing enterprise in Bristol Bay Alaska. The need was for a robust, seaworthy skiff less than 14' long (to save deck space on the mothership) yet as deep and wide as reasonable. Longitudinal benches to make moving about the boat as easy as possible without tripping, a level anti-slip floor, a foredeck large enough to accommodate a standard size pallet, and crane lifting points were also specified.

Because of the excellent performance, wide range of uses, and refreshing design, we are now offering this functional skiff to our dealers and customers. If you need a handsome yet highly functional, heavy duty skiff for a wide range of activities, this may be just the boat for you!

160" LENGTH
64" BOTTOM WIDTH
28" SIDES
20" TRANSON
.160" WELDED BOTTOM & SIDES
